

Newly HIV Positive? We need your help!

About Us:

The Seroconversion Study is a study of men who have been recently infected with HIV. It will provide valuable information for health promotion efforts and may be used in the development of health promotion materials for gay and other men who have sex with men.

Want more information?

If you'd like to know more, you can contact us on 02) 9385-0900, ... or email us at seroconversion@ncheacr.unsw.edu.au

NATIONAL CENTRE IN HIV
EPIDEMIOLOGY AND
CLINICAL RESEARCH

Who? • Men who have been recently infected with HIV can participate in this study. 'Recently' means anytime in the last 12 to 24 months.

How? • Go to www.hivss.net and enter this code: **sc2007-001** to start the survey. **Participation is anonymous and confidential.**

Why? • **We need to hear YOUR story!** This study is key in the development of health and educational promotions that matter to men who have sex with men. Your participation is **VITAL** to its success!
